

SO/AC Chair Reports

<http://brussels38.icann.org/node/12524>

Friday, 25 June 2010 – 09:00 – 10:00

[2010-06-25 09::16:42] Robert_Hoggarth: as we shift to our next session, please feel free to use the question form at <https://icann.wufoo.com/forms/icann-38-soac-chair-reports-session/> or just start your post with QUESTION or COMMENT. tx!

[2010-06-25 09::18:37] Jim_Fleming: long...lengthy...lots of words...any result?

[2010-06-25 09::20:20] Jim_Fleming: have all words in the dictionary been used in this speech yet ?

[2010-06-25 09::21:23] Jim_Fleming: zero content

[2010-06-25 09::21:28] George_Kirikos: Not in this speech, but they're all in the .com zone file, that's for sure.

[2010-06-25 09::22:15] Jim_Fleming: there is pERL PROGRAM THAT CAN WRITE SPEECHES LIKE THIS

[2010-06-25 09::23:39] Jim_Fleming: 100% circular talk

[2010-06-25 09::23:53] Doug_Barton: Robert, one of the reasons I like to be able to link up to the chat with a regular client instead of only connecting through the web is that it gives me the option to "ignore" individual members of the room whose comments are less than useful

[2010-06-25 09::24:08] George_Kirikos: lol Doug

[2010-06-25 09::26:12] Jim_Fleming: this is worthless gibberish

[2010-06-25 09::27:54] George_Kirikos: You can always ask a probative question, Jim.

[2010-06-25 09::27:54] Jim_Fleming: no no no questions

[2010-06-25 09::28:22] Robert_Hoggarth: @jim ... please re-familiarize yourself with ICANN"s behavior guidelines - here, <http://brussels38.icann.org/behaviour>

[2010-06-25 09::45:37] Jim_Fleming: For the Record: A fresh install of Linux Centos 5.4 on a generic PC does not have out-of-the-box support for this low-bandwidth IRC chat it asks for a Flash Plugin

[2010-06-25 09::46:12] George_Kirikos: Has anyone tried this Adobe Connect on the iPad? Or will the lack of Flash mean no chance of it ever working?

[2010-06-25 09::46:30] Doug_Barton: AFAIK it's a flash app

[2010-06-25 09::47:28] Jim_Fleming: For the Record: Microsoft has stated that HTML 5 will NOT be available on Windows XP

[2010-06-25 09::47:28] George_Kirikos: Actually, it looks like there's an app!

[2010-06-25 09::47:42] SeanPowell: Doug_Barton: there is an adobe connect app for Apple Iphone/Ipad/ipod lineups

[2010-06-25 09::47:46] George_Kirikos: (I don't have an iPad yet, but it would be perfect for this)

[2010-06-25 09::47:59] Doug_Barton: ah, very cool

[2010-06-25 09::48:14] SeanPowell: custom pods will not work, however

[2010-06-25 09::48:53] George_Kirikos: If someone has an Ipad, try logging in (you can download the app for free in iTunes).

[2010-06-25 09::49:07] Robert_Hoggarth: 2sean ... thanks for taking these tech queries!

[2010-06-25 09::49:18] SeanPowell: someone confirmed an ipod touch the other day. I imagine the iPad would work as well.

[2010-06-25 09::49:46] George_Kirikos: On an iPhone 4 it'd be nice, too, given the high resolution screen.

[2010-06-25 09::50:05] Doug_Barton: sean, that's true dedication

[2010-06-25 09::50:20] wseltzer: SeanPowell: will adobe connect improve on Linux?

[2010-06-25 09::51:00] Jim_Fleming: Comment/Question: Why doesn't ICANN switch to IPv6-only for meetings?

[2010-06-25 09::51:09] George_Kirikos: If you used the native chat, instead of the customized chat (which presumably links to IRC), maybe it'd work, Sean?

[2010-06-25 09::51:18] SeanPowell: wseltzer: I am not sure. Are you using the addin (outside of the browser)?

[2010-06-25 09::51:48] wseltzer: I've tried launching it in both firefox and chrome, not outside

[2010-06-25 09::52:04] SeanPowell: George_Kirikos: definitely. There are native IRC apps for all applie "i" lineups.

[2010-06-25 09::52:10] lightIRC_3032: are there 2 separate chat windows ?

[2010-06-25 09::52:14] SeanPowell: there is nothing proprietary about our IRC setup

[2010-06-25 09::52:41] wseltzer: appreciates the native IRC option

[2010-06-25 09::52:47] SeanPowell: wseltzer: Hmm. I know there are definitely some issues with Flash and Linux. are you running in a 64bit env by chance?

[2010-06-25 09::52:57] roman_irc: you can join the IRC via any client

[2010-06-25 09::52:59] George_Kirikos: Oh, I meant maybe if this is a "custom pod", is there a "standard pod" for chat that comes with Adobe Connect?

[2010-06-25 09::53:24] wseltzer: SeanPowell: no, 32. Something broke recently, as it had been working ok.

[2010-06-25 09::53:27] SeanPowell: George_Kirikos: oh, sorry.. misread your question. Yes, that would probably work.

[2010-06-25 09::53:34] roman_irc: @ george ,ÄË you are correct

[2010-06-25 09::53:35] George_Kirikos: Although, actually I guess your workaround would work as well.

[2010-06-25 09::54:03] Jim_Fleming: Adobe recently pulled their Flash Beta for 64-bit Linux

[2010-06-25 09::54:05] roman_irc: but we would not be able to provide a synced chat with low bandwidth option then

[2010-06-25 09::54:08] George_Kirikos: (although the multitasking on on iPhone is limited, so you might not get it all)

[2010-06-25 09::54:51] SeanPowell: wseltzer: I will look into it for you. I was under the impression there is an 'addin' version of Connect for Linux as well

[2010-06-25 09::55:06] Jim_Fleming: BTW yes the Centos 5.4 fresh install is/was a 64-bit Linux

[2010-06-25 09::55:29] George_Kirikos: Has ICANN experimented with Webex, or other competitors to Adobe Connect?

[2010-06-25 09::55:58] wseltzer: SeanPowell: thanks!

[2010-06-25 09::56:53] George_Kirikos: <http://www.webex.com/product-overview/index.html>

[2010-06-25 09::58:15] Jim_Fleming: Suggestion: If this is native IRC then why not provide direct access instructions along with the web link that says: "Requires Flas"

[2010-06-25 09::59:23] SeanPowell: Jim_Fleming: i will note that for next meeting - for now you can use chat.icann.org room #goldhall

[2010-06-25 09::59:37] Robert_Hoggarth: @jim thanks for the suggestion... we'll incorporate into our post-meeting lessons-learned sessions
